

# Intelli-Vend™

Your intelligent cash-handling solution

## Cash in circulation: on the rise

Cash continues to play an important role for retailers world-wide. The Reserve Bank of Australia estimates that cash in circulation grows by more than 7% each year. But growing cash volumes in circulation also means increased cash-handling costs for many retailers.

Today's retailers require complete control and real-time accountability for cash transactions at service stations and retail operations to better manage cash payments. An efficient system that can improve overall productivity, reduce internal shrinkage, deter armed robbery and significantly reduce cash-handling costs can provide retailers with significant bottom-line improvements.

*Focus on specific  
cash-handling  
challenges*

### Security risks

Exposed cash and larger floats at tills put retailers at greater risk for robbery and internal theft

### Lost time

Manual cash reconciliation and reporting can be time consuming, taking staff and management away from sales and customer service

### Shrinkage

The absence of 'real' inventory control can greatly increase cash-handling errors at point-of-sale terminals

### High costs

Current 'old school' cash-handling systems can cost retailers thousands per year, in both time, and money.

## Your intelligent cash-handling solution

Intelli-Vend™ is a secure, cash automation solution designed to count, secure and manage cash in your business. Not only a deposit safe, but also with the added advantage of being able to control the dispensing of specific amounts of notes and coins, on demand. This controlled dispensing capability enables you to automatically dispense initial floats and top-up change to cashiers, resulting in smaller floats, reduced cash holdings at tills, and saves hours of management time every day.

### Immediate benefits

1. Automated control and detailed auditing of all cash deposits and change transactions
2. Reduced potential for robbery and internal theft as a result of smaller floats and reduced cash holdings at tills
3. Increased productivity (average 2 hours per day)
4. Significant cost savings through reduced time and working capital requirements
5. Counterfeit note detection
6. Possible elimination of manual paperwork processes
7. Advanced cash and coin dispensing functionality (loose or rolled coins and notes)
8. Enhanced flexibility and efficiency
9. Simple and easy-to-use system

### Intelli-Vend™ in action

A world-leading provider of efficient and innovative security solutions, Gunnebo designed the Intelli™-range of cash automation solutions to meet the cash-handling needs of today's retailers. These modular, automated cash-handling systems offer an unrivalled level of customisation and scalability that deliver results at all levels in retail cash handling processes.

#### Step 1: Managing cash

Log in using your designated operator PIN code. Insert your notes while the system automatically counts, validates and secures your cash as it is deposited. Electronic control simplifies reconciliations, reduces the risk of exposed cash, and eliminates the need to spend time counting cash.

#### Step 2: Dispensing

Select from one of the numerous dispensing options to issue loose or rolled coins, or notes, or a combination of all three. Change can 'bought' in a "like for like" balancing transaction, or drawn down from previously established 'credit', or simply dispensed up to a predetermined operator level, per day. The result is smaller floats and reduced cash holdings at tills, and lower costs.

#### Step 3: Reporting

Reconcile your cash inventory through extensive reporting capabilities. Your options include automatic re-order or replenishment reports, inventory reports, end-of-day summaries, individual transaction/shift reports and bank clearance reports, to name but a few. It is possible to even customize your own specific report for the unique requirements of your own business.

### At a glance

Easy-load note dispenser: up to four denominations

Sealed, easy-to-swap deposit cassettes: 600, 1.200 and 2.200 note capacity cassettes (up to two per machine)

Easy-load loose/rolled coin dispensers: up to eight dispensers per machine

On-board thermal receipt printer: available for change inventory reporting; deposit/dispense receipts; and shift, day and clearance reports

High-security system: two-key access feature

Compact design: ideal for under-counter installation

High-performance note validators: secure note deposit and counterfeit rejection

### Technical data

Availability	24/7
Operation	frontload, staff-operated
Dimensions	845 x 770 x 550 cm
Weight	approx. 320 kg
Validator capacity	2 x 1.200 note cassettes
Cash capacity	Subject to final design
Power supply	1 x 10amp standard GPO
